

Meridian II pH/ORP and Conductivity Sensors Stop Sale Notice

Meridian II pH and 49xx Conductivity sensors

Due to the release of the new pHG pH/ORP and CCD Conductivity sensors, Honeywell will stop the sale of the legacy Meridian II and 4900 series Conductivity sensors, effective immediately.

Meridian I sensors and replacement assemblies will continue to be offered and are not affected by this change.

pHG Sensors

The new pHG series of pH and ORP sensors offer the following Key Features

- Glass pH electrodes
- ATC (Automatic Temperature Compensator) standard with pH
- ORP electrodes with Gold or Platinum sensors.
- Extended pressure range – up to 150 psi rating.
- Grounded sensor allows use with 50 ft cable without pre-Amp.
- Design allows for either inline or immersion mounting.

LOB	Process Instruments
Date	7/22/2024
Doc Type	Product Update
Bulletin #	2024-146
Product Line(s)	Meridian II, 49xx Conductivity Sensors
Partner Type(s)	All PI
Pole(s)	Global
Issued by	Michael.cushing@honeywell.com
	Owais.Arshad@honeywell.com PI Offering Manager

CCD Sensors

The new CCD series of Conductivity sensors offer the same Key Features as the 4900 series:

- 3/4" MNPT process connection
- ATC (Automatic Temperature Compensator) standard
- Cell constants - 0.01, 0.1, 1.10 and 50
- Temperature and pressure rating
